

Crash&Bell, suspension design Diesel Creative Team

Disel's rock soul has taken shape in two lamps, which are independent but complementary. Inspired by percussion instruments, Crash resembles a cymbal while Bell looks just as its name suggests. Both are available in bronze or aluminium colours and have been given a surface treatment with small, concentric grooves. They both use the same multi-faceted blown glass element resembling vintage glassware which projects beams of fragmented light onto the diffuser's metal surface and at the same time leaves the naked bulb in full view in a clear reference to the world of industry.

It is this two-fold light effect that gives Crash & Bell its powerful and unique impact. On their own, as a twosome or in groups, they steal the limelight in any young domestic environment or alternative contract environment.

Crash&Bell, suspension technical info

Description

Suspension lamps with semi-diffused and direct down light. Diffuser made of transparent hand-blown glass, the lower half of which is also sandblasted by hand. The two reflectors are made of a slab of aluminium, turned in a steel mould to ply it into shape, and then turned in a Teflon mould to achieve the characteristic stripes. The aluminium colour version is painted matt transparent on the inside and glossy transparent on the outside. The bronze version is painted glossy bronze colour both on the inside and on the outside. Diesel logo silk-screen printed onto the polycarbonate/injection moulded ABS mount, which is vacuum metallised. Stainless steel suspension cable and transparent electrical cable. Ceiling flange with galvanised metal bracket and glossy white batch-dyed ABS cover.

Materials: blown glass and painted aluminium

Colours: bronze, aluminium

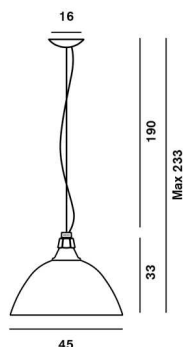

Brightness

semi-diffused and direct down light

Model

Crash&Bell Bell

Weight

net kg: 2,20
gross kg: 4,20

Packing

vol. m³: 0,114
n.boxes: 2

Bulbs

- Halogen 1x57W E27

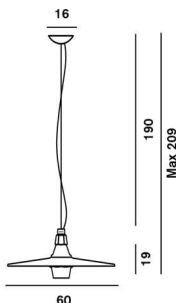

- compact fluorescent/LED retrofit 1x16W E27

Certifications

⊕ ⚡ CE IP 20

Diesel Creative Team

In 2009, Foscarini signed a partnership agreement with Diesel as part of the "Home Collection" home furnishings and lifestyle project. This partnership has given Foscarini the opportunity to make contact with a new target clientele and explore new lifestyles and furnishing trends through a collection conceived by Diesel for its own target group: "Diesel Living with Foscarini".

The Diesel Living with Foscarini collection speaks a range of different languages - from rock to pop, industrial to vintage, graphics to art - to illustrate the unmistakable Diesel lifestyle. Ironical, transgressive, eclectic, incandescent, the collection is made up of over 40 different lamp models. The collection is structured into a range of forms, materials and intended uses, lending itself to unexpected and unconventional settings, from domestic to public environments, always with a strong personality. The materials selected and researched for Foscarini, and perhaps even more so in the Diesel Living with Foscarini collection, are of the utmost importance. Materials which have never before been used in the lighting industry are the collection's added value.
