MVS Chaise

The MVS Chaise is perfect for a rejuvenating rest or quick nap. Although the recliner looks like a sculptural object at first glance, its comfort becomes immediately apparent upon use. The resilient material conforms to the body and is exceptionally soft and elastic. The frame's construction makes it easy for users to shift their weight from a sitting to a reclining position.

Materials

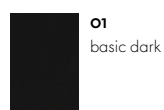

- **Backrest/footrest:** polyurethane integral foam shell with upholstered effect.
- **Headrest:** leather or polyurethane foam, matched to shell colour. Version with headrest in polyurethane foam suitable for outdoor use.
- **Base:** recliner suspended on stainless steel base, with sitting and reclining positions.
