Soft Pad Group

The design of the Soft Pad Group dates from the year 1969. In terms of both construction and shape, these chairs are similar to the design of the Aluminium Group, but their sewn-on cushions create a striking contrast to the slender aluminium profiles. The Soft Pad Chairs are softer and more voluptuous than the chairs in the Aluminium Group, but without losing the clean clarity of their common silhouette. The chairs adapt to the body of the sitter and provide extraordinary comfort.

Vitra has produced the Soft Pad Group

chairs over a period of decades in the same superior quality. This experience allows us to offer a 30-year guarantee on all of the chair models in the Soft Pad Group.

Materials

- In the standard version, the reverse side of the seat back is covered in Plano fabric. At additional cost, the reverse side is optionally available in the corresponding leather.
