

# HALFTIME

DESIGN BY COBE & HAY

HAY

## HALFTIME

Developed in collaboration with international firm COBE, the Halftime Chair was designed to possess the same robust and flexible properties as the building it was made for. With a moulded veneer seat and back riveted directly to the steel-tube frame, Halftime is a resilient, stackable chair with a clear expression that perfectly balances lightness, strength, and functionality. Crafted by the desire to create an extremely strong and durable chair that can last generations and is versatile enough for a wide range of contexts, Halftime is suitable for use in institutions, factories, cafés, and boardrooms.

## DESIGNED BY COBE & HAY

COBE is one of Denmark's leading architecture firms, with a strong international presence and clients around the world. Founded by architect & founder Dan Stubbergaard, this progressive and contemporary community of architects focuses on innovation and functionality across architecture and design – from buildings and public spaces, to large-scale urban planning.

“Hay's designs give the impression that it's OK to feel comfortable while using their products. Since we mostly design public buildings, cultural facilities and institutional structures, we're always looking for ways to informalise formal spaces. I think that's where HAY's design principles and furniture shine”.

— Dan Stubbergaard  
Architect & founder, COBE

Special colour variant for COBE

– COBE & HAY –

“I think working in this way, with design and architecture going hand in hand, is a fantastic platform. It was actually how all the great masters, with a few exceptions, worked; take Arne Jacobsen, Mies van Der Rohe and Le Corbusier for example. Unlike many of the design products we make, with Halftime the brief was actually created by the people who want to use this chair. It's a case of designing an object for a specific purpose, and you know exactly who is going to be using the object, and for what. This is a very inspiring way to work, because you stay relevant and create a reference to modern architecture”.

— Rolf Hay

Co-founder and Creative Director  
of HAY Furniture and Lighting

Special colour variant for COBE
