

The classic

in a new light

Light is more than just a pretty shine.
It brightens, gives warmth, sharpens our
perception. It also inherently changes
things. Light and energy are now integral
components of USM Modular Furniture Haller,
illuminating the path to your creative potential.
Put the things you love in a new light!

Light

reveals
the invisible

USM Haller in its purest form, equipped with only glass shelves and doors. Rear-facing lights draw attention to the setting; discreetly placed exhibit lighting provides selective accents. From illuminating an esteemed museum to a family home to a trendy urban bar – the integrated lighting gives the seemingly familiar an unimagined air of poetry.

Light
shows true
beauty

A seamless light fixture plus a timeless storage space:
The integrated light perfectly combines beauty and
practicality. Sensor-controlled lights in drawers and
compartments turn on automatically when opened.

Light
creates
atmosphere

Lamps directed backwards create unique moods, especially on textured surfaces – their reflection bathes favorite pieces in soft light. It's barely perceptible to the eye, but its function is indispensable: easily connectable USB chargers transform the design classic into a charging station for mobile devices.

Light

puts things
in focus

Several independently controlled circuits open unlimited possibilities in lighting design: Gently dimmable from full brightness – for brilliantly orchestrated elegance.

Light

helps you find
what you're
looking for

The design options with USM Haller and its modular light components are as individual as your wardrobe. Whether it outfits a walk-in closet or functions as a standalone piece in your bedroom or shop, USM makes a good impression when it comes to filing, storing and presenting. Fully customized to your personal needs.

Light
creates
desire

The desirable beauty of things can only be revealed with the right light. In showcases or extension doors or angled shelves, light provides the flattering high-lights in your showroom, museum, concept store and shop-in-shop concepts – anywhere that storage and perfect product presentation are required.

Light
fuels
creativity

The golden yellow work and charging station boosts the energy in your home office. The barely visible lights embedded in the tubes infuse warm light into your everyday life. USB chargers ensure that all mobile devices are powered 24 hours a day. Lights and USB chargers can be disconnected and moved at any time. The interior is evenly illuminated as soon as the compartments and drop-down doors are opened.

Light

guides and
welcomes you

Room accents, an entryway, a place of personal contact – light gets you noticed and gives your messages a brilliant dimension through perforated metal sheets. From the front, it looks like a handsome reception area. From the back, it reveals a working area and storage space. The integrated light is where creativity starts for newly conceived direction and signage concepts.

Light and energy at day and night

Top – Warm white 2700 Kelvin
Middle – Cold white 5700 Kelvin
Bottom – Unilluminated

The power supply is revolutionary: It is cable-free. Thanks to refinements of the ball, connector and tube, the power flow is integrated into the furniture structure. The light and USB inserts, which are snapped into place flush with the tube, are practically invisible when turned off.

What is intriguing is the variety of uses – the light inserts can illuminate the furniture itself or the room it is in, while the practical USB charger powers mobile devices.

The innovative e-Elements cast the classic in a brand-new light. Be creative!

Product details

The furniture, either completely or partially equipped with e-Balls and e-Tubes, is connected to an electricity source. The structure itself conducts the low voltage electricity to the desired location using the e-Balls, e-Connectors and e-Tubes in the furniture. USB chargers or light sources can be snapped into place in prede ined recesses. For covering recesses without a light or USB connection, dummy elements are available. The power supply is drawn from any point near the ground. The power supply cable is attached to a Haller e-Ball, and the power adapter is subsequently pushed underneath the furniture until only the operating switch remains visible. This means that the power supply requires no cables but rather is integrated into the structure of the furniture.

Application Options

- 1 **Glass Panel**
Glass elements can be illuminated throughout.
- 2 **Without Metal Paneling**
Compartments without metal paneling can be completely illuminated.
- 3 **With Metal Paneling**
Compartments with metal paneling can be illuminated from the front.
- 4 **Compartment with an Extension Shelf**
The entire compartment with an extension shelf can be illuminated.
- 5 **Drop-Down and Extension Door**
Via the "Light When Compartment Is Open" function, the light automatically turns on when the door is opened.
- 6 **Angled Shelf**
The presentation space is illuminated from the front.
- 7 **Floor Lighting**
With floor lighting, the light shines at a 25-degree angle under the furniture.
- 8 **Ambient Lighting**
The light is directed vertically towards the back, illuminating the surroundings with a warm glow.
- 9 **e-USB Charger**
It can be integrated in the same places as the e-Lights.

e-Elements

1 e-Lights

Dimmable, available in
– Warm white 2700 Kelvin
– Cool white 5700 Kelvin
Both with or without the
“light at compartment
opening” function.

2 e-USB Charger

Provides a voltage of
5 volts to the connected
device.

3 e-Dummy

Sleek, black e-Dummy
element close recesses
that are still unutilized.
If a piece of furniture
should later be supple-
mented with additional
light, using e-Tubes
(consuming), which are
first equipped with
e-Dummy elements, is
recommended.

4 e-Tube (power outlet)

Tubes with recesses for
e-Lights, e-USB Chargers
or e-Dummy elements that
can be easily snapped
into place or replaced.

L 350, 1 recess
L 500, 2 recesses
L 750, 3 recesses

5 e-Tube (conductive)

The conductive e-Tube
serves to conduct the
electricity if no inserts
are desired in this loca-
tion. It is available in
lengths of 750, 500, 395,
350, 250 and 175 mm.

6 e-Ball, e-Connector

To enable the flow of
electricity, the ball and
connector were refined.
The exterior dimensions
remain unchanged. The
distinguishing feature of
the ball is the black insu-
lation ring.

7 e-Power Supply

Includes dimmer at the
operating switch. Trans-
forms the power supply
voltage to 24 volts.

Engineered &
Made in Switzerland.

Dimensions

The USM Haller system provides a wide variety of elements in standard sizes. Widths, depths and heights are indicated below. All measurements refer to the distance between axes.

All measurements in mm.

e-Tube (power outlet) with recesses for e-Lights, e-USB Chargers or e-Dummy elements.

- L 350, 1 recess
- L 500, 2 recesses
- L 750, 3 recesses
